

100-10 Surgical Supply Kit

The Complete Solution

The 100-10 Surgical Supply Kit is designed to cover all the requirements for medical disposables in the treatment of 100 surgical inpatients for 10 days, including surgical operations.

"The importance of treating people quickly and efficiently even in the midst of a conflict situation was at the forefront of our minds at all time. Knowing that we always could count on medical supplies being available in a well-organized manner was invaluable to us."

*Toril Parelius, head nurse,
Norwegian Red Cross mission, Rwanda*

Well Established in the Field

The 100-10 Surgical Supply Kit has been utilized in the field by NGOs such as ICRC, the Norwegian Red Cross and Norwegian Peoples Aid, as well as by UNHCR, WHO and UNICEF. The response has been uniquely positive. Health personnel soon recognize that the well thought-out design assists in minimizing the logistical challenges they are faced with while working under adverse conditions.

Well Organized

The 100-10 Surgical Supply Kit is built on a thoroughly logical structure. The contents is clearly marked on the outside and the inside of each box. As a cross reference, Case One contains an alphabetical index locator for the total kit contents. This greatly simplifies the task of finding what is needed at the critical moment, especially for staff without previous logistics experience.

Compact

The equipment is packed in durable, splash-proof cardboard boxes, organized to fit onto two euro pallets. The boxes are clearly marked

with large numbers and a red stripe, making the 100-10 Surgical Supply Kit boxes easily identifiable when used in combination with other modular systems such as

NorHosp, the Norwegian Mobile Hospital and Disaster Unit. Special marking can be done upon request.

Weight & Volume:

Number of packages:	33	
Net weight:	435 kg	Load weight: 475 kg incl. 2 pallets
Net volume:	3.4 cbm	Load volume: 4.0 cbm incl. 2 pallets

(Adjustments may occur without prior notice)

The 100-10 Surgical Supply Kit was developed by the Norwegian Council of Health Preparedness. Apotekernes Fællesindkjøb keeps kits on stock at all times for prompt delivery.

Apotekernes Fællesindkjøb Preparedness Department is well established in the field of medical relief materials to emergency-, disaster-, and developing areas around the world.

Apotekernes Fællesindkjøb has gained wide recognition among national and international NGOs as well as in the UN system and with local authorities as the supplier of Norwegian Mobile Hospital and Disaster Unit (NorHosp) and Norwegian Medical Aid System (NorAid). They are continuously seeking new areas for product development.
