Deconsystem *CARGO MIDI*

Water Heater- CARGO MIDI

The *Cargo Midi* water heater together with *Aireshower* from Aireshelta provides a Decontamination Unit designed for Ambulance service, Hospitals and other first responder teams, etc. The water heater provides water at a temperature, in the showers, always + 35 degrees C at a flow rate of 40 litre per minute. The integrated system also provides warm air to heat up the surroundings inside the Aireshower.

The complete Unit fulfils the international demands and recommendations concerning the philosophy of Decontamination. It has also been developed in close liaison with the requirements of the Ambulance Service Association Working Group on Chemical Incidents.
